

VS18 series, 2 x 2/2, 2 x 3/2, 5/2 or 5/3 ISO valve island

- > Modular system offering a wide range of configuration options conforming to ISO 15407-2, 18 mm wide valves
- > 24 V d.c. or 115 V a.c. Multipole and single station sub-base
- > Integrated Fieldbus, Industrial Ethernet and IO-Link
- > Fieldbus expandable with single add-on stations, Industrial Ethernet and IO-Link expandable with double add-on stations.
- > Wide range of accessories including shut off valves enabling non-stop operation
- > Dual spool technology
 - Glandless spool and sleeve for long life
 - Softseal spool for high flow
- > Up to 40 solenoids, operating at 16 bar pressure
- > UL and ATEX

Technical features

Medium:

Compressed air, filtered to 40 µm, lubricated or non-lubricated

Operation:

VS18G: Glandless spool valve, solenoid pilot actuated

VS18S: Softseal spool valve, solenoid pilot actuated

Flow:

Function	Softseal l/min	Cv	Kv
2 x 2/2	550	0,56	0,46
2 x 3/2	600	0,61	0,52
5/2; 5/3	650	0,66	0,57
Glandless			
5/2; 5/3	550	0,56	0,48

Mounting:

Sub-base

Ports 2+4:

G1/8, NPTF 1/8, PIF 8 mm, PIF 6 mm, PIF 1/4

Operating pressure:

Maximum pressure
10 bar (145 psi) VS18S models
and VS18G solenoid pilot
actuated
valves with internal pilot supply
16 bar (232 psi) VS18G solenoid
pilot actuated valves with exter-
nal pilot supply

Media/Ambient temperature:

-15 ... +50°C (+5 ... 122°F)
(Ambient)
-5 ... +50°C (+23 ... 122°F)
(Media)
Air supply must be dry enough
to avoid ice formation at
temperatures below +2°C
(+35°F).

Materials:

Body/sub-base:
Die-cast aluminium
Glandless spool & sleeve
(VS18G): Aluminium,
hard anodised, PTFE coated
Softseal spool (VS18S):
Aluminium with HNBR seals
Plastic parts: POM, PA, PPA
Mounting sheets/screws: Steel,
zinc coated
Springs: Stainless steel
Sandwich plates: Aluminium
bar material, PA
Electrical contacts: Brass, tin
coated
PCB: Glass epoxy

Protection classification (IP Code):

All VS18 valve islands fulfill IP65 and NEMA4 ratings.

Power supply and precautions:

All VS18 24 V d.c products are designed to be used with a protective extra low voltage (PELV) power supply. All VS18 115 V a.c products correspond to the protection class I. Connection of the protective earth (PE) ground is required.

UL approval:

Recognized to UL 429 for Electrically Operated Valves
(not applicable for Industrial Ethernet, IO-Link and Fieldbus options).

ATEX:

The 24 V d.c valve islands fulfils the requirement of the standard 2014/34/EU for intended use in hazardous locations.

Equipment group, category, type of protection:

The Declaration of Conformity of the valve islands was conducted by IMI Precision Engineering Norgren GmbH, D-70731 Fellbach. Please review all ATEX data and notes in the maintenance and instruction booklet to eliminate any risks, allowing for safe function of the valve islands.

Note:

Please refer to the corresponding ATEX installation instructions and the maximum permissible operating conditions for valve islands in the ATEX zone.

The maximum allowed power consumption for ATEX is 20W. This corresponds to 16 simultaneously energized pilot valves. If a configuration consists of more than 16 pilot valves the user must undertake external actions (e.g. power-limited power supplies) to make sure that the power consumption of 20W is not exceeded.

This does not apply to IO-Link versions. Up to 40 pilot valves can be operated at IO-Link versions.

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under **»Technical features/data«**. Before using these products with fluids other than those specified, for non-industrial applications, life-support systems or other applications not within published specifications, consult IMI Precision Engineering. Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure. System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided. System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
